MERMAIDS IN CARRIACOU

August 25th, 26th and 27th Carriacou saw coming out of its fabulous water four (4) mermaids. Greg Holt of SCUBA RADIO, the Scuba Cowboy and the mermaids came

to make reports and present Carriacou to the USA diver's community.

On Fridays, Lumbadive offered them a dive followed by a mud bath and a picnic on White Island beach. Visit scubaradio.com for pictures and stories.

Sylvain's Tips

Remember in our last publication, I gave some tips about your new camera. Here are some others:

1-To remove the water drops that might stick to your camera lens when you get out of the water, as showed below, you may use a product for car windshields called RainX. This product reduces the water drop formation. You apply it as indicated on the box. You may use what's left for your car. :)

White balance: Try to always have with you a white slate to determine the white balance underwater. You may have to do

it at different depths. This way you'll get better colors on your pictures. Even if your camera has an underwater setting, you will get better results. Let us know if these tips helped you! Remember, when diving, take only pictures and leave only bubbles!
